

Yes, Sagittarians are generally very forgiving due to their optimistic, free-spirited, and forward-looking nature, preferring to focus on new experiences rather than dwelling on past hurts or holding grudges. Their philosophy is that life is too short for bitterness, and they often forgive by moving on, though some sources suggest they may not necessarily forget, simply choosing not to let negativity control them.

Why Sagittarians Forgive

- Optimism: Ruled by Jupiter, the planet of expansion, Sagittarians are inherently optimistic and tend to see the best in people and situations.
- Forward-Looking: They are too focused on future adventures and positive possibilities to hold onto anger or past grievances.
- Free-Spirited: For them, holding onto resentment is like being stuck in the past, which goes against their natural love for freedom and new experiences.
- Learning from Mistakes: Sagittarians view life's ups and downs as learning opportunities, including the mistakes of others.

The Nature of Sagittarius Forgiveness

- Quick to Move On: They often forgive and move forward quickly, preferring laughter and positive vibes over lingering anger.
- "Forgive and Forget": While they may forgive easily, some sources indicate they might not always truly forget, but they choose to let it go rather than letting the negativity impact them.
- Boundary Setting: Forgiving doesn't always mean forgetting or enabling repeated bad behavior; a Sagittarius might forgive and then simply adjust their boundaries, keeping a watchful eye on the person who wronged them.
