

Fragmented means broken into separate parts, divided into pieces, or lacking a unified whole. It describes physical objects that are shattered, as well as abstract systems or ideas that are disorganized.

Physical Meanings

- Broken objects: Shards of glass or a smashed vase.
- Separated pieces: Torn paper or broken bones.

Systems and Society

- Divided groups: A society split into opposing political factions.
- Disconnected processes: A health care system or business workflow where communication fails.

Technology and Data

- Hard drives: Files spread across non-contiguous sectors.
- Digital media: Content split across multiple isolated platforms.
