

A characteristic is a special quality, trait, or feature that helps identify and distinguish a person, living thing, or object. It shows what something is like or how it behaves.

Types of Characteristics

- Physical: Body shape, eye color, height, and hair texture.
- Behavioral: Habits, ways of reacting, or how an animal moves and hunts.
- Personality: Kindness, honesty, bravery, and patience.
- Biological: Growing, reproducing, needing energy, and responding to the world.
