

Repercussions are the indirect, widespread, and usually negative effects or consequences that follow an action, event, or decision. Key aspects include unexpected outcomes, a delayed reaction, and a chain-like impact.

Core Meaning

- Definition: A secondary result or backlash from a prior choice.
- Nature: Usually unpleasant, harmful, or unwanted.
- Timing: Often delayed or felt long after the initial act.

Common Types

- Economic: Market drops or job losses after a policy change.
- Social: Public backlash or damaged trust following a scandal.
- Personal: Punishments or lost opportunities after a mistake.
